Preface

Thank you for choosing a Canon product. Before using the machine, please read the following instructions for your safety.

Important Safety Instructions

WARNING

Except as specifically described in this guide, do not attempt to service the machine yourself. Never attempt to disassemble the machine: opening and removing its interior covers will expose you to dangerous voltages and other risks. For all service, contact Canon Customer Care Center, or a Canon Authorized Service Facility.

Handling and Maintenance

CAUTION

- Be careful when removing printed paper from output trays or when aligning it, because it may be hot and result in burn injury.
- Follow all warnings and instructions marked on the machine.
- Do not subject the machine to strong physical shocks or vibrations.
- Always unplug the machine before moving or cleaning it.
- To avoid paper jams, never unplug the power cord, open the scanning platform, or add or remove paper in the machine while printing.
- When transporting the machine, be sure to remove the toner cartridge from the machine.
- Place the toner cartridge in its original protective bag or wrap it in a thick cloth to prevent exposure to light.
- Always grip the handle on the sides of the machine when you lift the machine. Never lift the machine by any of its trays or attachments.
- Do not insert any objects into the slots or openings on the machine since they may touch dangerous voltage points or short out parts. This could result in fire or electric shock.
- Do not allow small objects (such as pins, paper clips, or staples) to fall into the machine.
- To avoid spillage in or around the machine, do not eat or drink near it.
- Keep the machine clean. Dust accumulation can prevent the machine from operating properly.

- Disconnect the power cord from the wall outlet and contact Canon Customer Care Center in any of the following cases:
 - When the power cord or plug is damaged or frayed.
 - If liquid or small object has fallen into the machine.
 - If the machine has been exposed to rain or water.
 - If the machine does not operate normally when you have followed the instructions in this guide. Adjust only those controls that are covered by the instructions in this guide. Improper adjustment of other controls may result in damage and may require extensive work by a qualified technician to restore the product to normal operation.
 - If the machine has been dropped.
 - If the machine exhibits a distinct change in performance, indicating a need for servicing.

Location

- Place the machine on a flat, stable, vibration-free surface that is strong enough to support its weight.
- Place the machine in a cool, dry, clean, well ventilated place.
- Make sure the area is free from dust.
- Make sure the location is not exposed to high temperature or humidity.
- Keep the machine away from direct sunlight as this can damage it. If you have to place the machine near a window, install heavy curtains or blinds.
- Do not use the machine near water. Make sure that no wet or humid objects come into contact with the machine.
- Do not use or store the machine outdoors.
- Do not place the machine near devices that contain magnets or generate magnetic fields, such as speakers.

- If possible, place the machine near an existing telephone line outlet for easy connection of the telephone line cord, and to avoid the expense of installing a new outlet.
- Place the machine near a standard 120 V AC (60 Hz) power outlet.
- To ensure reliable operation of the machine and to protect it from overheating (which can cause it to operate abnormally and create a fire risk), do not block the exhaust vent. Never block or cover any openings on the machine by placing it on a bed, sofa, rug, or other similar surface. Do not place the machine in a cupboard or built-in installation, or near a radiator or other heat source unless proper ventilation is provided. Leave at least 4" (10 cm) around all sides of the machine.

* The depth is 23 3/4" (602 mm) when toner cover is lifted up.

- Do not stack boxes or furniture around the power outlet. Keep the area free so you can reach the outlet quickly. If you notice anything unusual (smoke, strange odors, noises) around the machine, unplug the power cord immediately. Contact Canon Customer Care Center.
- Do not allow anything to rest on the power cord, and do not place the machine where the cord will be walked on. Make sure the cord is not knotted or kinked.

Power Supply

- During electrical storms, disconnect the power cord from the power outlet. (Please note that any data stored in the memory, including received fax documents, will be deleted if you disconnect the power cord.)
- Whenever you disconnect the power cord, wait at least five seconds before you plug it again.
- Do not plug the power cord into an uninterruptible power supply (UPS).

WARNING

This product emits low level magnetic flux. If you use a cardiac pacemaker and feel abnormalities, please move away from this product and consult your doctor.

Telephone Equipment

WARNING

When using telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons, including the following:

1. Do not use this machine near water (i.e., near a bathtub, kitchen sink, or laundry tub), or in a wet basement or near a swimming pool.
2. Avoid using the telephone during an electrical storm, as there may be a remote risk of electric shock from lightning.
3. Do not use the telephone to report a gas leak in the vicinity of the leak.

Pre-Installation Requirements for Canon Facsimile Equipment

A. Location

Supply a suitable table, cabinet, or desk. See p. 10-2 for the machine's weight and dimensions.

B. Order Information

1. Only a single line, touch-tone or rotary telephone set is to be used.
2. Order an RJ11-C modular jack (USOC code), which should be installed by the telephone company. If the RJ11-C jack is not present, installation cannot occur.
3. Order a regular voice grade line or the equivalent from your telephone company's business representative.

Use one line per machine.

DDD (DIRECT DISTANCE DIAL) LINE

-or-

IDDD (INTERNATIONAL DIRECT DISTANCE DIAL) LINE IF YOU COMMUNICATE OVERSEAS

NOTE

Canon recommends an individual line following industry standards, e.g. the 2500 (Touch Tone) or 500 (Rotary/Pulse Dial) telephones. A dedicated extension off a PBX machine without "Call Waiting" can be used with the machine. Key telephone systems are not recommended because they send non-standard signals to individual telephones for ringing and special codes, which may cause a fax error. This machine is not supported on Voice Over Internet Protocol (VOIP).

C. Power Requirements

This equipment should be connected to a standard 120-volt AC, three-wire grounded outlet only. Do not connect this machine to an outlet or power line shared with other appliances that cause "electrical noise." Air conditioners, electric typewriters, copiers, and machines of this sort generate electrical noise which often interferes with communications equipment and the sending and receiving of documents.

Connection of the Equipment

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the rear panel of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

An FCC compliant telephone cord and modular jack are provided with this equipment. This equipment is designed to be connected to the telephone network or premises wiring using a compatible modular jack which is Part 68 compliant. See the Starter Guide for details. The Ringer Equivalence Number (REN) is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. The REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., 10 is a REN of 1.0).

This equipment may not be used on coin service provided by the telephone company. Connection to party lines is subjected to state tariffs.

In Case of Equipment Malfunction

Should any malfunction occur which cannot be corrected by the procedures described in this guide, disconnect the equipment from the telephone line, unplug the network cable (if connected), and unplug the power cord. The telephone line should not be reconnected or the power cord plugged in until the problem is completely resolved. Users should contact Canon Authorized Service Facilities for servicing of equipment. Information regarding Authorized Service Facility locations can be obtained by calling Canon Customer Care Center (1-800-828-4040).

Rights of the Telephone Company

Should the equipment cause harm to the telephone network, the telephone company may temporarily disconnect service. The telephone company also retains the right to make changes in facilities and services which may affect the operation of this equipment. When such changes are necessary, the telephone company is required to give adequate prior notice to the user.

FCC Notice

FAXPHONE L90: Model F152800

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept an interference received, including interference that may cause undesired operation.

NOTE

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in this manual. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Canon U.S.A., Inc.

One Canon Plaza, Lake Success, NY 11042, U.S.A.

TEL No. 1-516-328-5600

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device to send any message via a telephone fax machine unless such message clearly contains in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity, or other individual sending the message and the telephone number of the sending machine or such business, other entity, or individual. In order to program this information into the machine, follow the instructions in the Starter Guide.

Pre-Installation Requirements for Canon Facsimile Equipment

A. Location

Supply a suitable table, cabinet, or desk. See p. 10-2 for the machine's weight and dimensions.

B. Order Information

1. Provide only a single-line to touch-tone or rotary telephone set terminated with a standard 4-pin modular phone plug. (Touch-tone is recommended if available in your area.)
2. Order an CA11A modular jack (USOC code), which should be installed by the telephone company. If the CA11A jack is not present, installation cannot occur.
3. Order a normal business line from your telephone company's business representative. The line should be a regular voice grade line or equivalent. Use one line per machine.

DDD (DIRECT DISTANCE DIAL) LINE

-or-

IDDD (INTERNATIONAL DIRECT DISTANCE DIAL) LINE IF YOU COMMUNICATE OVERSEAS

NOTE

Canon recommends an individual line following industry standards, e.g., the 2500 (touch tone) or 500 (rotary/pulse dial) telephones. A dedicated extension off a PBX machine without "Camp On" signals is also permissible with the machine. Key telephone systems are not recommended because they send non-standard signals to individual telephones for ringing and special codes, which may cause a fax error.

C. Power Requirements

The power outlet should be a three-prong grounded receptacle (Single or Duplex). It should be independent from copiers, heaters, air conditioners or any electric equipment that is thermostatically controlled. The rated value is 120 volts and 15 amperes. The CA11A modular jack should be relatively close to the power outlet to facilitate installation.

Notice

This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

Cet appareil est conforme aux Spécifications techniques des équipements terminaux de l'Industrie du Canada.

Ceci est confirmé par le numéro d'enregistrement. L'abréviation IC précédant le numéro d'enregistrement signifie que l'enregistrement a été effectué sur la base de la Déclaration de conformité indiquant que le produit est conforme aux spécifications techniques du Canada. Ceci n'implique pas que le produit ait été approuvé par l'industrie du Canada.

Before installing this equipment, users should ensure that it is permissible to be connected to the facilities of the local telecommunications company. The equipment must also be installed using an acceptable method of connection. The customer should be aware that compliance with the above conditions may not prevent degradation of service in some situations.

Repairs to certified equipment should be coordinated by a representative designated by the supplier. Any repairs or alterations made by the user to this equipment, or equipment malfunctions, may give the telecommunications company cause to request the user to disconnect the equipment.

Users should ensure for their own protection that the electrical ground connections of the power utility, telephone lines and internal metallic water pipe system, if present, are connected together. This precaution may be particularly important in rural areas.

 **CAUTION**

Users should not attempt to make such connections themselves, but should contact the appropriate electric inspection authority, or electrician, as appropriate.

 **NOTE**

This Class B digital apparatus meets all requirements of the Canadian Interference- Causing Equipment Regulations.

Cet appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

The Ringer Equivalence Number (REN) for this terminal equipment is 1.0. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

Le Nombre d'équivalence Ringer (REN) de cet appareil terminal est 1.0. Le REN attribué à chaque équipement terminal fournit une indication sur le nombre maximum de terminaux pouvant être connectés sur une interface téléphonique. La terminaison sur une interface peut consister en n'importe quelle combinaison d'appareils, à la condition seulement que la somme des Nombres d'équivalence Ringer de tous les appareils ne soit pas supérieure à 5.

Toner Cartridge

The lifetime of the Canon genuine starter toner cartridge which comes with the machine is approximately 1,000 pages, the Canon genuine replacement toner cartridge is approximately 2,000 pages. The page counts are based on 5% coverage* when printing A4 size paper with the default print density setting. The level of toner consumption varies depending on the type of documents printed. If your average document contains a lot of graphics, tables, or charts, the life of the toner cartridge will be shorter as they consume more toner. When you are replacing a toner cartridge, be sure to use a toner cartridge designed for this product. To purchase the Canon genuine replacement toner cartridge, contact your local Canon dealer or Canon Customer Care Center (U.S.A.:1-800-828-4040, Canada:1-800-652-2666).

* The term "5% coverage" denotes a document on which the area covered with toner is 5% of the total area of a sheet.

Toner Cartridge name:
Canon Cartridge 104

Model Name	Type	Supported Canon Genuine Cartridge	Print Yield
L90	Bundled	Canon Cartridge 104 Starter	Approx. 1,000 pages
	Replacement	Canon Cartridge 104	Approx. 2,000 pages

Maintaining the Toner Cartridge

- Keep the toner cartridge away from computer screens, disk drives, and floppy disks. The magnet inside the toner cartridge may harm these items.
- Avoid locations subject to high temperature, high humidity, or rapid changes in temperature.
- Do not expose the toner cartridge to direct sunlight or bright light for more than five minutes.
- Store the toner cartridge in its protective bag. Do not open the bag until you are ready to install the toner cartridge in the machine.
- Save the toner cartridge's protective bag in case you need to repack and transport the toner cartridge at a later date.
- Do not store the toner cartridge in a salty atmosphere or where there are corrosive gases such as from aerosol sprays.
- Do not remove the toner cartridge from the machine unnecessarily.
- Do not open the drum protective shutter on the toner cartridge. Print quality may deteriorate if the drum surface is exposed to light or is damaged.
- Always hold the toner cartridge by its handle to avoid touching the drum protective shutter.
- Do not stand the toner cartridge on end, and do not turn it upside down. If toner becomes caked in the toner cartridge, it may become impossible to free it even by shaking the toner cartridge.

- If there is a toner powder leakage, make sure not to inhale or touch the toner powder. If it comes in contact with your skin, rinse with cold water using soap. If you feel an irritation on your skin or inhale the powder, consult a doctor immediately.
- When removing the toner cartridge from the machine, make sure to remove it carefully. If not removed with care, the toner powder may scatter and come in contact with your eyes and mouth. If this happens, rinse with water and consult a doctor immediately.
- Keep the toner cartridge away from small children. If they ingest the toner powder, consult a doctor immediately.
- Do not disassemble the toner cartridge. The toner powder may scatter and come in contact with your eyes and mouth. If this happens, rinse with water and consult a doctor immediately.

Cleaning the Machine

Note the following before cleaning your machine:

- **Make sure no document is stored in memory, and disconnect the power cord.**
- **Use a soft cloth to avoid scratching the components.**
- **Do not use tissue paper, paper towels, or similar materials for cleaning; they can stick to the components or generate static charges.**

CAUTION

Never use volatile liquids such as thinners, benzene, acetone, or any other chemical cleaner to clean the machine. These can damage the machine components.

NOTE

When you disconnect the power cord, the documents stored in memory will be erased. To check the jobs stored in memory, see the following:

- “Checking and Deleting Fax Documents Stored in Memory,” on p. 3-44
- “Checking and Deleting Print Jobs,” on p. 6-5

Exterior

- 1** Disconnect the power cord from the machine.
- 2** Wipe the machine’s exterior with a clean, soft, lint-free cloth dampened with water or diluted dishwashing detergent solution.
- 3** Wait for the machine to dry, then reconnect the power cord.

Interior

Clean the machine's print area periodically to prevent toner powder and paper dust from accumulating inside.

- 1** Disconnect the power cord from the machine.
- 2** Close the paper delivery tray extension (A), and then the paper delivery tray (B) itself.

CAUTION

Do not close the paper delivery tray without folding the extension first.

- 3** Open the toner cover by the notch (A).

4 Remove the toner cartridge.

⚠ CAUTION

- Do not touch the rollers and parts which have labels "CAUTION! Hot surface avoid contact" on. They become very hot during use.
- To avoid exposing the toner cartridge to light, place it in its protective bag or wrap it in a thick cloth.
- Do not open the drum protective shutter on the toner cartridge. Print quality may deteriorate if the drum surface is exposed to light or is damaged.

🔧 NOTE

Always hold the toner cartridge by its handle.

5 Use a clean, soft, dry, lint-free cloth to remove any toner or paper debris from the machine's interior.

⚠ CAUTION

- Do not touch the fixing assembly (A) as it becomes very hot during use.
- Do not touch the pins (B) or the transfer roller (C) as this can damage the machine.

- If loose toner comes into contact with your skin or clothing, wash with cold water. Warm water will set the toner.

- 6** Hold the toner cartridge by its handle (A).

- 7** The arrow (A) on the toner cartridge should be facing away from you and pointing down.

- 8** Insert the toner cartridge so that the guide (A) on the left side of the toner cartridge fits into the groove inside the machine and slide it down parallel to the guide.

- 9** Push the toner cartridge to make sure it is properly set in the machine.

10 Close the toner cover.

CAUTION

Be careful not to get your fingers caught.

11 Reconnect the power cord.

Fuser Roller

If black streaks appear with printing, the fuser roller in the main unit may be dirty. Should this occur, clean the fusing roller in the following procedure. The roller should also be cleaned each time the toner cartridge is replaced. Load a sheet of blank LTR paper into the feeder and start cleaning.

NOTE

Cleaning the roller takes approximately 180 seconds.

- 1** Press [Menu].
- 2** Press [◀] or [▶] to select <ADJUST./CLEANING>, then press [OK].
- 3** Make sure that a sheet of blank LTR paper is in the feeder.

NOTE

Use standard paper as the cleaning paper. Throw away the cleaning paper after use.

Scanning area

Keep the scanning area clean to avoid dirty copies or faxes to be sent.

If your documents have black streaks or appear dirty after copying them using the ADF, this may be caused by pencil lead rubbing off the documents and onto the roller. Clean the ADF scanning area and roller.

1 Disconnect the power cord from the machine.

2 Lift the paper stack cover and pull it out completely.

 **NOTE**

Make sure the back end of the cover does not catch the front paper guide.

3 Lower the scanning platform (A) in the document delivery slot.

4 Gently wipe the scanning glass (A) and white sheet (B) with a clean, soft, lint-free cloth moistened with water.

 **NOTE**

Do not dampen the cloth too much, as this may tear the document or damage the machine.

- 5** After the scanning area becomes dry, lift the scanning platform back into place.

- 6** Insert the paper stack cover.

 **NOTE**

Make sure the back end of the cover does not catch and lower the scanning platform.

- 7** Reconnect the power cord.

Replacing the Toner Cartridge

When the toner is running low, the message <TONER LOW/PREPARE NEW TONER> appears on the LCD. In that case, redistribute toner in the toner cartridge. We recommend that you prepare a new toner cartridge for future replacement with ease.

If the message appears while copying or printing, the running job will be executed. If the message appears while receiving a fax, the fax will not be printed and the received data will be stored in the memory. If you do not have a new toner cartridge and you want to print out the documents immediately, set <CONT. PRINTING> in <PRINTER SETTINGS> in <FAX SETTINGS> to <ON>. The default setting for <CONT.PRINTING> is <OFF>. We recommend that you set the setting back to <OFF> after replacing the toner. (See “CONT. PRINTING,” on p. 9-11.)

CAUTION

- When <CONT. PRINTING> is set to <ON>, the printed documents may be light or blurred because of lack of toner. The data is erased when the documents are printed out, so you can not print the same documents again.
- Do not touch the rollers and parts which have labels “CAUTION! Hot surface avoid contact” on. They become very hot during use.

Redistributing Toner

- 1 Close the paper delivery tray extension (A), and then the paper delivery tray (B) itself.

- 6** Hold the toner cartridge with one hand, and pull the seal completely out.

CAUTION

- If toner is adhered on the removed seal, be careful that your hands or clothes do not get dirty from touching the toner.

Recycling Used Cartridges

Canon has instituted a worldwide recycling program for cartridges called “The Clean Earth Campaign”. This program preserves precious natural resources by utilizing a variety of materials found in the used cartridges that are of no further use, to remanufacture new cartridges which, at the same time, keeps the environment cleaner by reducing landfill waste. Complete details concerning this program are enclosed in each Cartridge box.

The Clean Earth Campaign

● THE Canon CARTRIDGE RECYCLING PROGRAM

The Canon Cartridge Recycling Program fulfills the first initiative of Canon’s Clean Earth Campaign, which supports four critical environmental areas:

- Recycling in the Workplace
- Conserving Environmental Resources
- Scientific Research and Education
- Encouraging Outdoors Appreciation

The remaining “Clean Earth” initiatives are supported in the U.S. through sponsorships of the National Park Foundation, the National Wildlife Federation, and The Nature Conservancy and in Canada through donations to the World Wildlife Fund Canada and The Nature Conservancy of Canada.

Since its inception, The Canon Cartridge Recycling Program has collected huge amount of cartridges that otherwise would have been discarded into landfills or similar facilities. Instead, this rapidly growing program returns used cartridges to the manufacturing process, thus conserving an array of resources.

Becoming a part of this worthwhile program is easy. When your cartridge is of no further use, simply follow the instructions detailed for U.S. or Canadian residents.

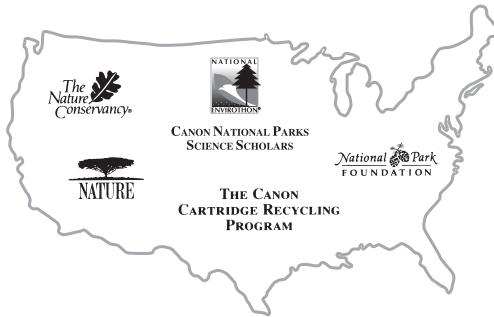

We appreciate your support of The Canon Cartridge Recycling Program.

Working together we can make a significant contribution to a cleaner planet.

- Cartridges collected through this program are not refilled.
- You are not entitled to a tax deduction or rebate for the return of empty cartridges.
- This program may be modified or discontinued without notice.
